

Feed Additives

Rumenox

GET MORE ENERGY FROM EVERY MOUTHFUL!

Rumenox is an important addition to your feed.

It is a rumen modifier containing the active ingredient monensin.

Whether it's a high end blend or a low cost mix, adding Rumenox will help cows digest their feed more efficiently. It does this by altering the bug population in the rumen ensuring your cows get more energy from every mouthful.

There is a wealth of research in New Zealand and internationally that supports the benefits of Rumenox. With over 2000 published papers on monensin, this is one of the most researched animal health products in the world.

In addition to improving feed efficiency Rumenox will:

- Improve reproductive performance
- Reduce ketosis
- Improve cow condition
- Control bloat
- Increase milk protein

Simply ask Rumenox to be added to your feed.

Zinpro

ZINPRO CLASSIC DAIRY BLEND

Supplemental Rate: 3 grams/cow/day

WATER SOLUBLE

	Actives (mg)	Actuals (g)
ProPath LQ Cu 180*	125	0.694
ProPath LQ Zn 180*	360	2.000
Cobalt (Sulfate 21% Co)	12	0.057
Iodine (EDDI 79.5%)	10	0.013
Selenium (Sodium Selenite)	5	0.011
Magnesium (Sulfate TriHyd)		0.225

Contains: * Amino Acid Complex

THE ROLE OF TRACE MINERALS IN DAIRY PRODUCTION

Zinc

- Immune and enzyme systems
- Antioxidant
- Feed conversion
- Keratin production for hooves and teat canal
- Epithelial tissue (uterine wall, gut lining, skin health, wound healing)
- Protein synthesis

Copper

- Immune and enzyme systems
- Reproduction
- Growth
- Strengthening of structural proteins

Cobalt

- Vitamin B12 synthesis
- Fibre digestion
- Appetite stimulant
- Rumen fermentation
- Methionine metabolism

Selenium

- Antioxidant
- Immune system
- Free radical scavenger

Iodine

- Constituent of thyroid hormones
- Hormones for growth of organs
- Energy metabolism
- Protein synthesis
